

Bootstrap Homework

This homework has two components.

The first is the infrastructure part. To get 50% of your grade, I want to see your work on github and on your webserver. I don't just want to see a single commit on github. I want to see a history of your changes. In other words, I want to be able to clone your work and see the git log of the work you done. So basically, you should commit your changes each step of the way.

Remember, the "Fresh Meat" with the Butcher from Diablo III comment. Save at a safe point each step of the way so you can restore. Additionally, I want to see your finished work posted to your webserver. You do not have to post your files to blackboard.

The second half of your grade is from completing the two examples found here:

- [Exercise #1: Media Queries](#)
- [Exercise #2: Bootstrap](#)

This should be a fairly easy one... use any resources you need online to complete this work.
